ADMINISTRATIVE INFORMATION

The anthropometric survey reported herein was performed to meet the requirements of Bureau of Naval Weapons WEPTASK RAE 13C 005/2001/R005 01 01, Problem Assignment No. 005AE13-23 entitled "Field Anthropometric Survey and Center of Gravity Measurements of Naval Aviators" and Bureau of Medicine and Surgery Work Unit MR005.13-9040.1 entitled "Components of Variance in Anthropometry."

Sincere appreciation is expressed to Mr. H. T. E. Hertzberg and Mr. M. Alexander of the Behavioral Sciences Laboratory, Aerospace Medical Research Laboratories, Aerospace Medical Division, Air Force Systems Command, Wright-Patterson Air Force Base, Ohio, for their support and technical assistance throughout this study, and to Mr. Edmund Churchill, Director, Anthropology Research Project, Antioch College, Yellow Springs, Ohio, for his valuable help in the data breakdown and analysis.

This technical documentary report has been reviewed and is approved.

HENRY G. WAGNER
CAPT, MC, USN
Director

ABSTRACT

Body size data for 96 measurements of 1,549 U.S. naval aviators are presented. The techniques of measurement are illustrated by schematic drawings and reference to the literature. Both diametral and surface measurements are included. Dimensions are given in both centimeters and inches. Statistics included are percentiles, means, standard deviations, and coefficients of variation. These data are presented for use by designers of aircraft workspaces and designers of personnel protective clothing and equipment.

$N = 1549$

INTRODUCTORY REMARKS

Naval aviation research and development programs aimed at the evaluation of personnel protective equipment and the design of adequate aircrew station configurations have, in the past, been seriously handicapped by a lack of suitable anthropometric data on naval flying personnel. This situation has become increasingly more apparent in weapon system development programs during recent years. Especially evident was the lack of correspondence between aircrew station dimensions and the requirements for space to adequately accommodate the functioning crew member. During surveys conducted in the fleet in other project areas, many complaints were informally gathered from fleet pilots and other flying personnel concerning the above items.

The desire to correct inadequacies of a limited anthropometric survey conducted during 1957-1958 (1) gave rise to the full-scale survey which forms the subject of this report. A trained anthropometric measuring team visited ten naval and marine corps air stations during 1964 to obtain the data presented here. The population from which the sample was drawn is defined as follows:

- "1. Designated Naval and Marine Corps Aviators in all three categories.
2. All permanently designated Naval (and Marine Corps) Aviation Officers (aeronautically designated personnel in the sense of OPNAV Instruction P-3710.7B), including Naval Aviation Observers, Naval Aviation Pilots, and those Flight Surgeons who are designated Naval Aviators.
3. Included under Naval or Marine Corps aviation officers are Bombardier-Navigators, Radar-Observers, and other permanently designated aeronautical personnel who can expect duties involving flying during their entire careers.
4. Enlisted personnel who are permanently designated aeronautical personnel and who can expect to be assigned duties involving flying for the duration of their careers, but excluding those enlisted personnel who are presently assigned duties involving flying, but who may not be so assigned at future duty stations (actual number was 14 subjects)."

The sample size in this survey was 1,549, slightly more than 10 per cent of the naval and marine corps aviator population. The Guide to Anthropometric Data lists the measurements taken during this survey. Inasmuch as written descriptions of the measurements already exist in the literature (2, 3), these descriptions are not repeated in this report. In order to provide the reader with a ready reference for the locations of the morphological feature measurements, schematic drawings (Figure 1A to G) have been prepared (2) with the numbers on these drawings corresponding to the numbers in the "Percentile Listing" column in the Guide.

N-1048

Written descriptions for all the measurements are contained in reference 2, except for numbers 42, 45, 48, 51, 54, 56, 79, and 96. For this latter group, the written description is contained in reference 3.

It is intended that the data reported herein will be used by designers of aircrew workspaces, as well as by designers of aircrewman personnel protective clothing and equipment. Subsequent reports on this survey will include a detailed breakdown of the measuring equipment and procedures used, correlation coefficients, an analysis of the skinfold data to permit an estimate of the per cent of body fat, and sizing programs for use with clothing and equipment.

U.S. NAVAL AIR ENGINEERING CENTER, PHILA., PA. 19112 1. Report NAECAEGL-533 U.S. NAVAL AIR ENGINEERING CENTER, PHILA., PA. 19112 1. Report NAECAEGL-533
AEROSPACE CREW EQUIPMENT LABORATORY 2. Problem Assignment No. 005AE13-23
 ANTHROPOMETRY OF NAVAL AVIATORS - 1964; by E. C. Gifford, J. R. Provost, and J. Lazo,
 111 p., illus., 8 October 1965.
 3. BUMED Work Unit MR005.
 13-9040.1
 4. Available from DDCG

Body size data for 96 measurements of 1,549 U.S. naval aviators are presented. The techniques of measurement are illustrated by schematic drawings and reference to the literature. Both diametral and surface measurements are included. Dimensions are given in both centimeters and inches. Statistics included are percentiles, means, standard deviations, and coefficients of variation. These data are presented for use by designers of aircraft workspaces and designers of personnel protective clothing and equipment.

INSTRUCTIONS

1. ORIGINATING ACTIVITY: Enter the name and address of the contractor, subcontractor, grantee, Department of Defense activity or other organization (corporate author) issuing the report.

2a. REPORT SECURITY CLASSIFICATION: Enter the overall security classification of the report. Indicate whether "Restricted Data" is included. Marking is to be in accordance with appropriate security regulations.

2b. GROUP: Automatic downgrading is specified in DoD Directive 5200.10 and Armed Forces Industrial Manual. Enter the group number. Also, when applicable, show that optional markings have been used for Group 3 and Group 4 as authorized.

3. REPORT TITLE: Enter the complete report title in all capital letters. Titles in all cases should be unclassified. If a meaningful title cannot be selected without classification, show title classification in all capitals in parenthesis immediately following the title.

4. DESCRIPTIVE NOTES: If appropriate, enter the type of report, e.g., interim, progress, summary, annual, or final. Give the inclusive dates when a specific reporting period is covered.

5. AUTHOR(S): Enter the name(s) of author(s) as shown on or in the report. Enter last name, first name, middle initial. If military, show rank and branch of service. The name of the principal author is an absolute minimum requirement.

6. REPORT DATE: Enter the date of the report as day, month, year, or month, year. If more than one date appears on the report, use date of publication.

7a. TOTAL NUMBER OF PAGES: The total page count should follow normal pagination procedures, i.e., enter the number of pages containing information.

7b. NUMBER OF REFERENCES: Enter the total number of references cited in the report.

8a. CONTRACT OR GRANT NUMBER: If appropriate, enter the applicable number of the contract or grant under which the report was written.

8b, 8c, & 8d. PROJECT NUMBER: Enter the appropriate military department identification, such as project number, subproject number, system numbers, task number, etc.

9a. ORIGINATOR'S REPORT NUMBER(S): Enter the official report number by which the document will be identified and controlled by the originating activity. This number must be unique to this report.

9b. OTHER REPORT NUMBER(S): If the report has been assigned any other report numbers (either by the originator or by the sponsor), also enter this number(s).

10. AVAILABILITY/LIMITATION NOTICES: Enter any limitations on further dissemination of the report, other than those

imposed by security classification, using standard statements such as:

- (1) "Qualified requesters may obtain copies of this report from DDC."
- (2) "Foreign announcement and dissemination of this report by DDC is not authorized."
- (3) "U. S. Government agencies may obtain copies of this report directly from DDC. Other qualified DDC users shall request through _____."
- (4) "U. S. military agencies may obtain copies of this report directly from DDC. Other qualified users shall request through _____."
- (5) "All distribution of this report is controlled. Qualified DDC users shall request through _____."

If the report has been furnished to the Office of Technical Services, Department of Commerce, for sale to the public, indicate this fact and enter the price, if known.

11. SUPPLEMENTARY NOTES: Use for additional explanatory notes.

12. SPONSORING MILITARY ACTIVITY: Enter the name of the departmental project office or laboratory sponsoring (paying for) the research and development. Include address.

13. ABSTRACT: Enter an abstract giving a brief and factual summary of the document indicative of the report, even though it may also appear elsewhere in the body of the technical report. If additional space is required, a continuation sheet shall be attached.

It is highly desirable that the abstract of classified reports be unclassified. Each paragraph of the abstract shall end with an indication of the military security classification of the information in the paragraph, represented as (TS), (S), (C), or (U).

There is no limitation on the length of the abstract. However, the suggested length is from 150 to 225 words.

14. KEY WORDS: Key words are technically meaningful terms or short phrases that characterize a report and may be used as index entries for cataloging the report. Key words must be selected so that no security classification is required. Identifiers, such as equipment model designation, trade name, military project code name, geographic location, may be used as key words but will be followed by an indication of technical context. The assignment of links, roles, and weights is optional.
